1.0 Introduction

The WRAP research *Household Food and Drink Waste in the UK 2012*¹, published in November 2013, used information from a number of individual studies. For two of these, the waste compositional analysis and kitchen diaries, a key element was the questionnaire(s) asked to households involved in the studies. This information from these questionnaires was also used in two subsequent reports:

- *Household Food and Drink – A Product Focus*³
- *Household Food and Drink – A People Focus*⁴

This document contains the questionnaires used, including the questions and the options available to respondents. The questionnaires included are:

- For the waste compositional analysis (§2.0);
- Pre-diary survey for the kitchen diary research (§3.0)
- Post-diary survey for the kitchen diary research (§4.0)
- Recruitment survey for the kitchen diary research (§5.0)

The methodology for the research elements in which these surveys were used is described in *Methods used for Household Food and Drink Waste in the UK 2012*⁵.

Which, if any, of the following would you say applied to you during the diary week? (Your answers won’t affect us sending you the voucher!) MULTICODE

- I became aware of how much I/my children was wasting so I made an effort to waste less 1
- I didn’t record everything that I threw away if the amounts were quite small 2
- I didn’t record everything that I threw away if it was too much of a fiddle or I was short of time 3
- Other members of my household disposed of food or drinks without it being recorded 4
- I didn’t do my usual clear-outs, for example of food gone past its best before date, but waited until after the diary had finished to dispose of it 5
- Behaviour or type of food normally eaten changed – WRITE IN 6
- Any other reasons – WRITE IN 7

9. Taking everything into account, including people unusually spending time away from the home, special occasions during the week, the sunny weather and the accuracy of your diary, how does the amount of food and drink in your diary relate to that actually generated in a typical week? MULTICODE
