

36 organisations from the clothing sector have pledged to consistently measure and report their global carbon, water and waste impacts for the first time. These SCAP Signatories have committed to take action to reduce their carbon, water and waste footprints of clothing they supply or receive in the UK by 15%, starting from a baseline year of 2012. In addition to signatories, over 50 organisations provide collaborative support to the voluntary agreement and to signatories to help achieve these targets.
